LUXENT + ORACLE NetSuite

Your Recipe for Growth.

Powering the Food & Beverage Industry with NetSuite + Luxent.

THE CHALLENGE:

OUTGROWING YOUR SYSTEMS. LOSING VISIBILITY.

Food and beverage companies face a paradox of success—rapid growth exposes the limits of the systems that got them there. Spreadsheets, disconnected platforms, and manual workarounds quickly become a liability when managing multiple SKUs, retail accounts, co-manufacturers, and 3PL partners.

Common Challenges Include:

- **Disconnected systems:** No shared source of truth across finance, inventory, and supply chain.
- **No cost visibility:** Can't track true COGS across SKUs and channels in real time.
- **Retail readiness gaps:** Manual EDI and no easy way to prove operational credibility to buyers.
- **Scaling pains:** The tools that worked at $5M break at $20M.
- **Manual reconciliation:** Hours lost reconciling POs, invoices, and inventory.

Disconnected systems don't just slow you down—they make growth dangerous. In a fast-moving industry, you can't afford to operate blind.

THE SOLUTION:

A UNIFIED PLATFORM BUILT FOR F&B GROWTH.

Luxent helps food and beverage companies unify their operations on NetSuite, the #1 cloud ERP platform. Together, Luxent and NetSuite give you a single, reliable source of truth that connects finance, inventory, supply chain, and e-commerce—from the warehouse to the retail shelf.

- ✓ **Automate what matters.** Less manual work, fewer errors, faster decisions.
