LUXENT + ORACLE NetSuite

# Your Business. Fully Connected.

*Powering the Wireless Industry with **NetSuite + Luxent.***

## THE CHALLENGE:

*DISCONNECTED SYSTEMS. DISCONNECTED TEAMS.*

Wireless providers face growing complexity—more contracts, more sites, and more pressure to deliver faster service with leaner teams. Yet many still rely on disconnected systems that limit visibility and slow decision-making.

**Common Challenges Include:**

- **Fragmented data:** Financial, service and inventory systems that don't communicate.
- **Manual work:** Redundant, paper-based processes that waste time and create errors.
- **Limited visibility:** Difficulty tracking projects, rentals or field performance in real time.
- **Complex billing:** Recurring contracts and revenue recognition that require manual oversight.
- **Scalability:** Platforms built for a smaller footprint can't handle new sites, acquisitions, or multi-entity complexity.

*Disconnected systems make growth harder—and in an industry built on connection, that's a serious problem.*

## THE SOLUTION:

*A CONNECTED PLATFORM FOR A CONNECTED INDUSTRY*

Luxent helps wireless companies unify their operations on NetSuite, the #1 cloud ERP platform. Together, Luxent and NetSuite give you a single, reliable source of truth that connects finance, field service and inventory from the back office to the field.

**With Luxent + NetSuite, you can:**

- ✓ **Connect every function.** Finance, field service, inventory, and projects all work from the same data.
- ✓ **Automate what matters.** Streamline billing, renewals, and reporting to free up time and reduce errors.
- ✓ **Track every asset.** Manage equipment, rentals, and site inventory from the warehouse to the tower, with full project and cost visibility.
- ✓ **See everything in real time.** Mobile dashboards keep your team in sync, informed, and accountable.
- ✓ **Scale confidently.** Standardize workflows and reporting to support future growth and acquisitions.
