

NETSUITE VS. WORKDAY

NetSuite has 27x as many financial customers as Workday*

	Workday	NetSuite
Proven financial planning and analysis functionality with strong and intuitive budget, forecast and modeling capabilities.		ORACLE NETSUITE
Finance first system with real-time financial reporting.		ORACLE NETSUITE
Originally built as a Human Resources tool with traditional batch closing time standards for reporting.		
Sales, implementation and support teams catered to understand the unique challenges of your business combined with an end-to-end customer engagement model based on industry leading practices and 20+ years of cloud financial management experience.		ORACLE NETSUITE
Open developer community with hundreds of third-party 'SuiteApps' supporting the core financial solution; thousands of developers have the ability to help improve code.		ORACLE NETSUITE
Recently developed PaaS program that does not allow thousands of third-party developers access to UX to improve product functionality; limited to 13 approved partners.		
One system that supports financials, sales, inventory, ecommerce and support.		ORACLE NETSUITE
Closed community of developers; any new innovating must be curated and certified by controlling company.		
Strong segment reporting and analysis.		ORACLE NETSUITE
A single data repository.		ORACLE NETSUITE
24/7 support coverage options; myriad of packages to suit customer needs for systems support.		ORACLE NETSUITE
Advanced Customer Support providing dynamic solutions to both common and uncommon customer issues.		ORACLE NETSUITE
Flexibility with UI set-up; ability to customize look and layout of forms.		ORACLE NETSUITE
